BHARATH MUDDULURU

mbharath1603@gmail.com | +91 9963431015 | Linkedin | Github | Portfolio

SKILLS

Languages: C++, SQL, Javascript, Python
Frameworks: MERN (MongoDB, Express, React, Node.js), Next.js, Tailwind CSS, JQuery
Tools: Git, GitHub, Docker, Postman, VS Code
Machine Learning & AI Tools: Scikit-learn, TensorFlow, PyTorch, NLP libraries, MLflow, Jupyter Notebook
Libraries: Pandas, NumPy, Scikit-learn

WORK EXPERIENCE

Associate
PwC **July 2025 –Present**

- Designed and integrated **APIs** with **request/response mapping**, enabling data exchange across **external systems.**
- Processed **10K+ records/transaction** and optimized SOQL queries, reducing processing time by **30–40%.**
- Developed and delivered **scalable, business-critical features** using Apex, LWC, and JavaScript, enhancing workflow efficiency by **25%+** and accelerating feature delivery by **20%** across Agile sprints.
- Resolved **20+ production issues** improving system stability; created reusable components reducing frontend effort by **25%.**
- Utilized **Git and Bitbucket** for version control, enabling **collaborative development, code reviews, and CI/CD integration**.

Backend Engineer
Urbanchat.ai **June 2024 – September 2024**

- Built and maintained **Node.js & Express APIs**, delivering **2+ features** including voice AI integration and improving system functionality.
- Improved chatbot accuracy by **~60%** using **prompt engineering** and **Pinecone vector database optimization.**

Web Developer Intern
Neovatic Technologies Pvt Ltd **November 2023 – December 2023**

- Developed a **React + Node.js application** with real-time data handling, improving data retrieval speed by **20–25%.**
- Automated workflows using **UiPath RPA**, reducing manual effort by **50%** through data extraction and email automation.

PROJECTS

Personalized Finance Assistance [Demo] [GitHub]

- Built a **MERN-based finance platform** for tracking income, expenses, and investments with real-time portfolio insights
- Integrated **AI chatbot + financial APIs**, reducing API calls by **50%** through pagination and debounce optimization.

AttriTrack [GitHub]

- Trained a **Logistic Regression model (Python, scikit-learn)** achieving **90% accuracy** for predicting customer attrition
- Performed **data preprocessing (100+ missing values)**, improving dataset quality by **15%** and enhancing model performance.

LEADERSHIP

Technical Head | IEEE TEMS **2024 – 2025**

- Led 4 technical domains, mentored members, and organized 2 + major events

EDUCATION

B-Tech in Computer Science and Business Systems | Vellore Institute of Technology | CGPA: 8.77 **2021 – 2025**
HSC | Fiitjee, Hyderabad | TSBIE SCORE (XII): 95% **2019 – 2021**
High School | Sanskruthi Global School | CBSE SCORE (X): 94.4% **2017 – 2019**
